CARBOTEX®

PREMIUM QUALITY FISHING LINE

CARBOTEX ORIGINAL *(from page 4)*

Color: Lo-Vis Carbon Grey and Clear/Transparent

Length: 100m, 150m, 300m, 500m, 600m, Big spool packaging

The polyamide copolymer with CARBON-TEXTURE technology eventuate prominently stable and strong molecular bonds. These bonds give the line ultra high tensile strength and superior knot strength. Remarkable UV-stability. The advanced quality controlled manufacturing and the newly developed Japanese raw material along with German engineered additives provides a very special fishing line.

Developed for general fishing
Ultra high tensile strength and superior knot strength
Low visibility under water
Suitable for salt and freshwater

CARBOTEX COATED *(from page 8)*

Color: Lo-Vis Deep Grey and Hi-Vis Neon Yellow

Length: 100m, 150m, 300m, 500m, 600m, Big spool packaging

The surface of the fishing line is treated by a special material enhancing abrasion resistance. This coating material infiltrates into the molecular structure of the line and makes it withstand the abrasive conditions. Reliable on the roughest underwater terrains as well.

Coated for superior abrasion resistance
Excellent castability
Higher knot strength
Suitable for salt and freshwater

CARBOTEX DSC *(from page 12)*

Color: Lo-Vis Silver and Hi-Vis Red Glow

Length: 100m, 150m, 300m, 500m, 600m, Big spool packaging

The DSC® technology revolutionary changed all the parameters of the fishing line. All monofilament absorb water during fishing. This fact can reduce the line's strength up to 50% of its original strength. The special DSC® technology provides a hard stable thin treatment on the surface of the line. This treatment protects the line from absorbing water.

The CARBOTEX® DSC® line keeps its tensile and knot strength when exposed to water. The surface treatment increases abrasion resistance and the life of the line.

Double Silicon Coating for trouble-free fishing
Keeps its tensile and knot strength when exposed to water
Strength and low memory for excellent casting
Suitable for salt and freshwater

CARBOTEX SENSITIVE *(from page 16)*

Color: Lo-Vis Smoke Grey and Gold

Length: 100m, 150m, 300m, 500m, 600m, Big spool packaging

Our engineers using a special additive succeeded in creating a low stretch, ultra sensitive line with the strength and toughness to meet any challenge. It is New CARBOTEX SENSITIVE to ensure ultimate control from rod to hookset. You will feel the fine bite indications and even small baits can be easily cast. The bait runs evenly during spinning.

Sensitive for excellent control
Ultimate control from rod to hookset
Low stretch, ultra sensitive, extra strong
Suitable for salt and freshwater

CARBOTEX ORIGINAL, CARBOTEX COATED, CARBOTEX DSC, CARBOTEX SENSITIVE **BIG SPOOL PACKAGING** *(pages 25-28)*

CARBOTEX BRAIDED *(page 24)*

Color: Faded Green

Length: 135m

The ultra thin CARBOTEX BRAIDED line has superior strength. The heat-treated surface coating makes a tough line with supereminent abrasion resistance. It has better casting capabilities than other lines because it is heavier and less likely to tangle. Sensitivity and long durability combines with toughness against rough and sharp objects.

Braided for superior strength
Ultimate casting performance
Near zero stretch and supereminent abrasion resistance
Suitable for salt and freshwater

CARBOTEX[®]

PREMIUM QUALITY FISHING LINE

CARBOTEX CATFISH (page 24)

Color: Lo-Vis Steel Grey

Length: 150m (diameter 0,700mm), 170m (diameter 0,650mm), 190m (diameter 0,600mm)

Due to the Carbon-Texture and DSC technology and the high quality Japanese raw material a new fishing line CARBOTEX CATFISH has been developed. With the help of additives and continuous quality control the developers succeeded in creating a line that despite its high diameter has softness and successfully resists the hackle-teeth of the catfish.

Developed for catfish and other predators

Soft despite its high diameter

Successfully resists the teeth of the predators

Suitable for salt and freshwater

CARBOTEX ICE (from page 20)

Color: Lo-Vis Carbon Grey, Clear/Transparent, Hi-Vis Neon Yellow

Length: 25m, 30m, 50m (10 connected spools)

Length: 50m, 100m (individual box)

The winter version of Carbotex fishing line has been treated on the surface with special components to keep all necessary parameters unchanged in a low temperature range. Carbotex Ice has zero ice build-up, truly a cold water line. Strong, yet supple. Features zero weather tolerance, little stretch, maximum sensitivity.

Tough and very strong, true to pound test.

Developed for winter fishing

Keeps its suppleness when exposed to cold water

Extraordinary strength and high sensitivity

Suitable for salt and freshwater

CARBOTEX BOILIE & CARP (page 24)

Color: Hi-Vis Matte Fluo Yellow and Lo-Vis Oil Brown

Due to pigments and special TITAN derivatives used in manufacturing the new Carbotex Boilie and Carp line it has high visibility in the dark, helping anglers to catch nightly active fish.

The top quality additives and precise manufacturing process ensure the suppleness and extraordinary strength of Carbotex Boilie and Carp.

Developed for carp fishing

High visibility in the dark

Suppleness and extraordinary strength

Special TITAN-derivative additives

CARBOTEX FLUOROCARBON (from page 29)

Color: Clear/Transparent

Length: 50m, 100m, 150m, 300m

CARBOTEX 100% FLUOROCARBON FISHING LINE:

The easy-cast Carbotex 100% Fluorocarbon features a very close refractive index to water making it virtually invisible. The line does not absorb water and this way retains its dry knot strength.

The Carbotex 100% Fluorocarbon has higher density than water so it can sink fast. It has excellent abrasion resistance.

Applications:

For the most demanding situations when knot strength, durability and abrasion resistance are essential.

100% Fluorocarbon lines for excellent knot strength, fast sinking and underwater invisibility

Virtually invisible under water

Sinking line

Retains 100% of its knot and line strength when wet

Suitable for salt and freshwater

KG test

Tests were performed according to ISO Standard 2062:1993 which is accepted by EFTTA (European Fishing Tackle Trade Association). At the tests CRT (Constant Rate of Travel) WOLPERT testing machine was used.

The sample with a grip to grip length of 500 mm was pulled at a constant speed of 500 mm/minute up to its brake.

The load recorded at the moment it breaks is the tensile strength.

In the case of the knot strength test the sample was pulled with a simple knot tied previously at the middle of the length.

F test

F test figure does not confirm with tensile strength value measured in laboratory. F-TEST value shows the tensile strength of the line under natural circumstances, while fish is exposed to buoyancy in water, it does not confirm with the tensile strength value measured under artificial laboratory conditions.
